

# SETUP IPAD STAND

## 32001

1. Connect the underside of the circular steel base to one end of the aluminium post

- 2a Unlock and open the fascia of the tablet enclosure, feed the power cable through the circular slot in the rear plate, then down through the aluminium post, until it appears on the underside of the floor base. Connect the tablet enclosure to the top of the aluminium post. Open the fascia of the tablet enclosure to connect the tablet. Close the fascia and depress the lock button to securely lock the enclosure.

- 2b Open the fascia of the tablet enclosure. Attach the power cable to the tablet then carefully position it in the enclosure (If using a portable power pack, place the pack into position first, then connect the power cable directly to it, then connect a second cable from the power pack to the tablet). Close the fascia and depress the lock button to securely lock the enclosure
